Inconsistency Supervisor Menu

Determine Inconsistencies to Check/Don't Check

This option allows you to choose what data items should be checked for inconsistencies at your site when running the Consistency Checker. Once a data item is selected, a message will be displayed telling you under what conditions that data item will be considered inconsistent.

Below is a numerical listing of each of the data items which you may select to have checked by the Consistency Checker. A single asterisk (*) indicates the data element is set to ON by the PIMS software and cannot be edited. A double asterisk (**) indicates the data element is set to OFF by the PIMS software and cannot be edited.
